This focus on youth breaking into the fintech sector comes as Singapore's fintech funding hit a three-year high in 2022.

According to the FinTech Talent Report 2022 by SFA and Accenture, the fintech sector in Singapore attracted investments of close to US\$4.1 billion (S\$5.53 billion) in 2022. This was a US\$700 million increase from US\$3.4 billion in 2021.
